

Nature Sketches combines three of our techniques in one exciting collection. The first technique is our hand stitched single-color embroidery, which combines hand drawn artwork, hand digitizing, and four layers of thread for a bold look. The second technique is echo stitching, which is a quilting stitch that follows the shape of the designs. The third technique is realistic shading, which contains multiple layers of fabric and thread blending. The end result is striking! The contrast of hand stitching and realism really makes the birds and butterflies pop on the neutral background. The best part about

this collection is that you can combine it with other Anita Goodesign collections. Nature Sketches is part of our Mix & Match Quilting line and contains over 20 designs that can be incorporated into a quilt with other collections. All of the collections in the Mix & Match quilting line come with 5," 6," 7," 8," and 9" blocks that are beautifully interchangeable. Visit our website, www.anitagoodesignonline.com for additional information.

NATURE SKETCHES QUILT

These designs look great as a quilt or wall hanging

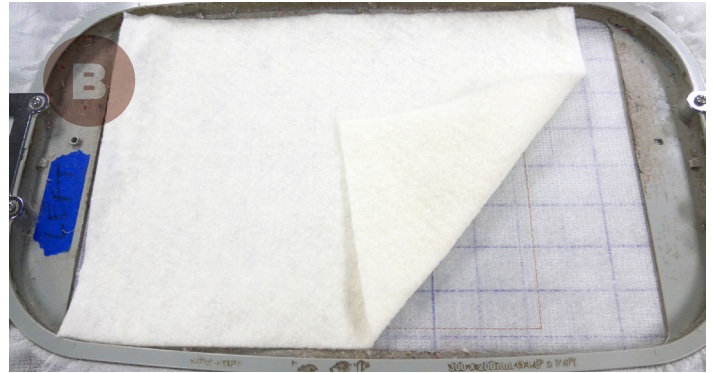

NATURE SKETCHES STEP BY STEP INSTRUCTIONS

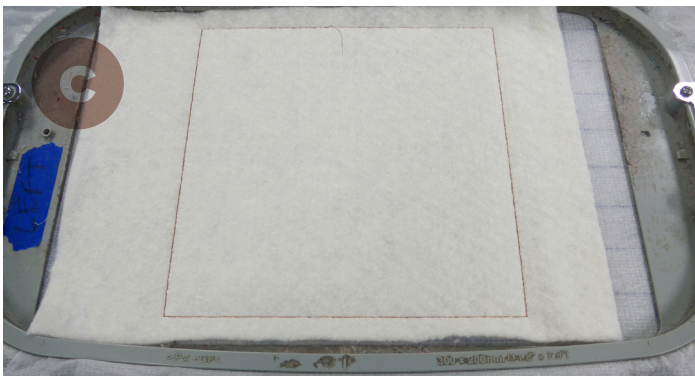

To start hoop a piece of No Show Mesh stabilizer. Stitch the first step of the design. This is the placement stitch for your batting.

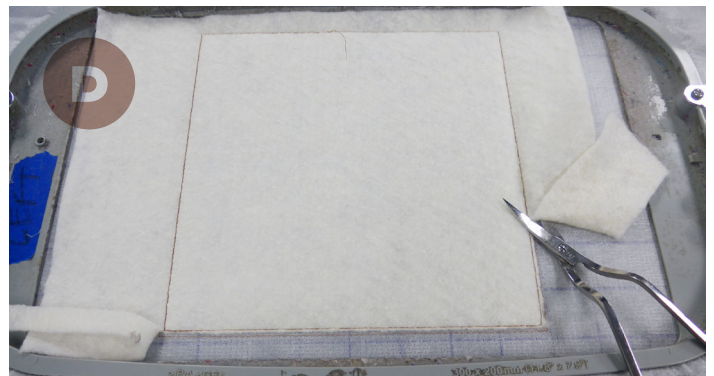

Note: We are using a dark thread here for pictures, but you'll want to match your thread to the fabric.

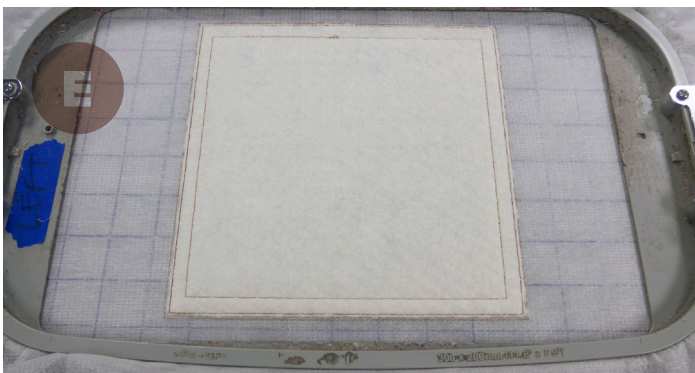

Place the batting over the placement stitch making sure to completely cover all stitches.

The second step is the tacking stitch; this secures your batting in place.

Trim away any excess batting.

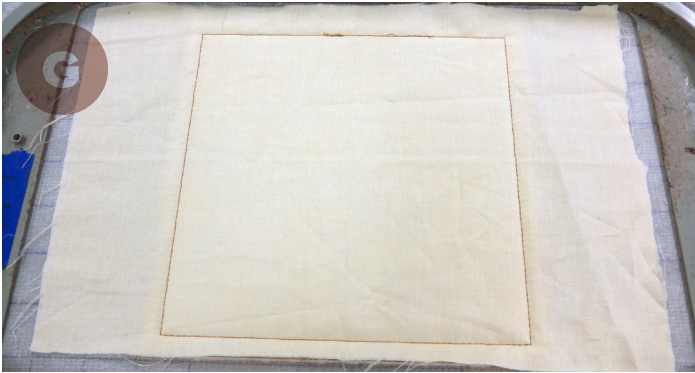

Stitch the next step. This is the placement stitch for the base fabric.

Place the base fabric over the placement stitch making sure to cover all stitches.

NATURE SKETCHES STEP BY STEP INSTRUCTIONS

The next step is the tacking stitch. This secures your base fabric in place.

Trim away any excess fabric. No seam allowance is needed here since we will be adding a folded fabric border later.

Once your fabric is trimmer you will need to stitch the rest of the embroidery steps in the block. The last 12 steps will be the folded fabric borders. Begin this technique by running the first folded fabric placement stitch.

Place your folded fabric piece right-side down so that $\frac{1}{4}$ " of the fabric overlaps the inner edge of the placement stitch. Make sure you have enough fabric to cover the whole stitch to allow for seam allowance.

Stitch the next step of the design. This is the folding stitch.

Fold the fabric over the folding stitch. The fabric is now right-side up and covering the entire placement stitch. Stitch the next step of the design. This is the tacking stitch which will secure the folded fabric in place.

Note: Use painter's tape to hold the fabric in place.

NATURE SKETCHES STEP BY STEP INSTRUCTIONS

Repeat steps A-D for the remaining three sides.

Once the folded fabric borders are finished, remove the block from your hoop and place it on a cutting table. Using a rotary blade, trim away the excess stabilizer and fabric leaving a 1/2" seam allowance.

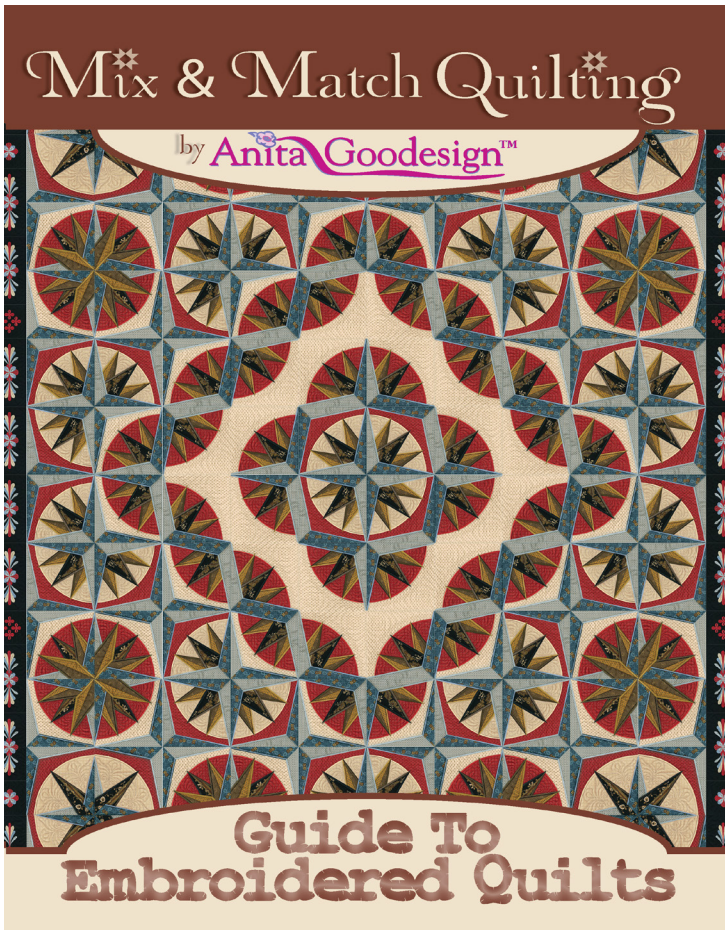

You're finished! You will stitch out each block like this.

ANITA GOODESIGN GUIDE TO EMBROIDERED QUILTS

Be sure to open this tutorial that is located on the CD-Rom

When we first developed our quilting line, we wanted to write a comprehensive guide to creating a quilt that covered every aspect of quilting. We called it the Anita Goodesign Guide to Embroidered Quilts. We wrote this book that covers everything from choosing fabric and thread colors to stabilizer tips, as well as guides on quilt layouts. There are also multiple step-by-step tutorials on appliqué blocks, folded fabric blocks, trapunto techniques and everything in between. There are also ideas on what else you can create with your quilt blocks besides a traditional quilt. The last section is all about finishing your quilt including binding, backing and stitching in the ditch. Instead of making each individual tutorial included with the collections longer, we decided to include the Guide to Embroidered Quilts on every quilting title to give you the most insight into creating the perfect project. Be sure to read through the book before starting your first project. The PDF file is located in the tutorial section of the CD-Rom.

Choosing Fabric and Thread

Choosing fabric for a project can be either the most fun or the most challenging. We use many different methods to choose fabric but one of our favorites is to use fat quarter bundles and jelly roll strips. The fat quarter bundles usually have more than a dozen different fabric colors and make perfect borders and appliques. We start with a fat quarter bundle and then choose a solid fabric to go with it for the quilt backgrounds. We use the fat quarter bundles to choose our thread as well. We simply bring the fat quarters to our thread rack and pull colors that match the fabric. This way when we stitch those colors on the solid background they go perfectly with our borders and applique colors.

Quilt Size Calculator

We have created this chart as a reference only. These are measurements based on "average" quilt sizes, you can make your quilt whatever size you prefer, just be sure to account for block size variance and seam allowance.

We suggest test sewing a few blocks together for a more accurate measurement. Take your desired finish quilt size and divide by your finished block measurement, then round this number to the closest whole number. This will give you the number of blocks you need to achieve your desired finished size.

Example: $45/7.375 = 6.1$ or 6 Blocks
6 columns by 6 rows will result in a $45" \times 45"$ crib quilt.

**This measurement does not include borders, sashings or bindings.

Quilt Size	Size A Finished Block ~ 7 3/8"	Size B Finished Block ~ 6 3/8"	Size C Finished Block ~ 5 3/8"	Size D Finished Block ~ 4 3/8"
Crib Finished Size: ~ 45" x 45"	6 Columns x 6 Rows = 36 Blocks Total	7 Columns x 7 Rows = 49 Blocks Total	9 Columns x 9 Rows = 81 Blocks Total	11 Columns x 11 Rows = 121 Blocks Total
Twin Finished Size: ~ 67" x 89"	9 Columns x 12 Rows = 108 Blocks Total	10 Columns x 14 Rows = 130 Blocks Total	12 Columns x 16 Rows = 192 Blocks Total	15 Columns x 20 Rows = 300 Blocks Total
Double/Full Finished Size: ~ 82" x 89"	11 Columns x 12 Rows = 132 Blocks Total	13 Columns x 14 Rows = 156 Blocks Total	15 Columns x 16 Rows = 240 Blocks Total	18 Columns x 20 Rows = 360 Blocks Total
Queen Finished Size: ~ 89" x 96"	12 Columns x 13 Rows = 156 Blocks Total	14 Columns x 15 Rows = 210 Blocks Total	16 Columns x 18 Rows = 288 Blocks Total	21 Columns x 22 Rows = 462 Blocks Total
King Finished Size: ~ 104" x 96"	14 Columns x 13 Rows = 182 Blocks Total	16 Columns x 15 Rows = 240 Blocks Total	19 Columns x 18 Rows = 342 Blocks Total	23 Columns x 22 Rows = 506 Blocks Total

*This measurement was taken after the blocks were embroidered and sewn together using a 1/2" seam allowance. Depending on your seam allowance, measurements may change.

Stitched and Applique Blocks

Step 4 is the tack down stitch for your base fabric; this is a double stitch and will secure your fabric to the stabilizer.

If the block has a stipple background be sure to match the thread to your fabric.

The first step with any applique is the placement stitch. Stitch the next step in the design. This is your placement stitch for the first applique fabric and will show you where to lay your applique fabric.

Place your fabric over the placement stitch. Make sure the piece is large enough to completely cover the placement stitch. You can use painters tape to hold it in position if you desire.

After step one has stitched, place your scrap of fabric over these stitches. Make sure to completely cover this area.

The next step is the tack down stitch. This series of beam stitches will secure the applique fabric to your base fabric.

The second step with any applique is the locking stitch that will lock the fabric in place.

Once the machine has stopped stitching, remove the hoop from your machine but leave the fabric hooped. Carefully cut the excess fabric from around the design.

NATURE SKETCHES SIZES

Each of the block designs come in five sizes. The sample we embroidered used the large size. Each of the 5 sizes look wonderful. Of course, the larger sizes take longer to embroider. We created all of our samples using the "A" size.

Designs with the letter **"AA"** at the end are the largest designs for a hoop that can embroider at least 9.2" x 13.8"

Designs with the letter **"A"** at the end are the large designs for a hoop that can embroider at least 7.8" x 11.8"

Designs with the letter **"B"** at the end are the medium designs for a hoop that can embroider at least 6.8" x 10.3"

Designs with the letter **"C"** at the end are the small designs for a hoop that can embroider at least 5.8" x 8.8"

Designs with the letter **"D"** at the end are the smallest designs for a hoop that can embroider at least 4.8" x 7.2"
