STITCH ORDER AND COLOR CHARTS

It is very important to stitch out these designs in the sewing order digitized. Often times the colors on your computer screen may be very funky. This is NORMAL and is because each format has it's own color palette. Some formats are limited in their color selections and will switch on screen to a totally different color by default. This is the reason for the color charts that are provided with each design set. Please refer to the color sequence charts and you will be fine!

*** I get many emails asking what threads I digitize in. I don't. :-) I digitize by my color preference. I pray that nobody is locked into thread numbers...paint with your thread...CHANGE your colors..use your creativity. Any color charts for design sets released after DBJJ096 that contain thread numbers will be for ROBISON ANTON SUPER BRIGHT POLYESTER OR FLORIANI POLYESTER if I do color charts with numbers, simply because I've chosen that as a default for my digitizing program.
