This collection is full of colorful, realistic roosters and sunflowers. We had a lot of fun creating this collection and we hope you will enjoy embroidering it, too. We did the roosters in an assortment of styles and colors. We created green, gray, brown and black roosters. Do you have to make them all different, too? No, if you want to embroider just green roosters for example, you can take the green color choices from one of the green rooster colorways and apply it to any of the other roosters in the collection. We did them in different colors to give you an idea of the variety of colors you can choose. This collection has a lot of color changes in it due to the realistic aspect of these designs, however, they are well worth it when finished!

For this month's project we created a wall hanging using home decor fabric and three of the large rooster designs. This wall hanging is sure to create a great accent and make any country kitchen unique.

The following pages contain a brief tutorial on creation of the sample as well as design colors and notes.

Linda Winzeler, Steve Wilson and staff

Country Kitchen

Anita Goodesign

These are scans of the fabric swatches we chose to create the project.
Be sure to include colors from the fabrics in the designs.

This is the pattern for the Country Kitchen wall hanging.

The tipped squares are bordered by ONE INCH strips sewn in a windmill fashion.

All measurements given are FINISHED dimensions, so don't forget to add seam allowances! I add one inch to the measurements to give me half inch seams. TIP: when cutting strips, give yourself a couple of inches extra so you can true all edges with a ruler and your rotary cutter. When cutting the triangles, just cut two 12 inch squares to make your 4 triangles and two 9.5 inch squares to make the other 4 triangles.

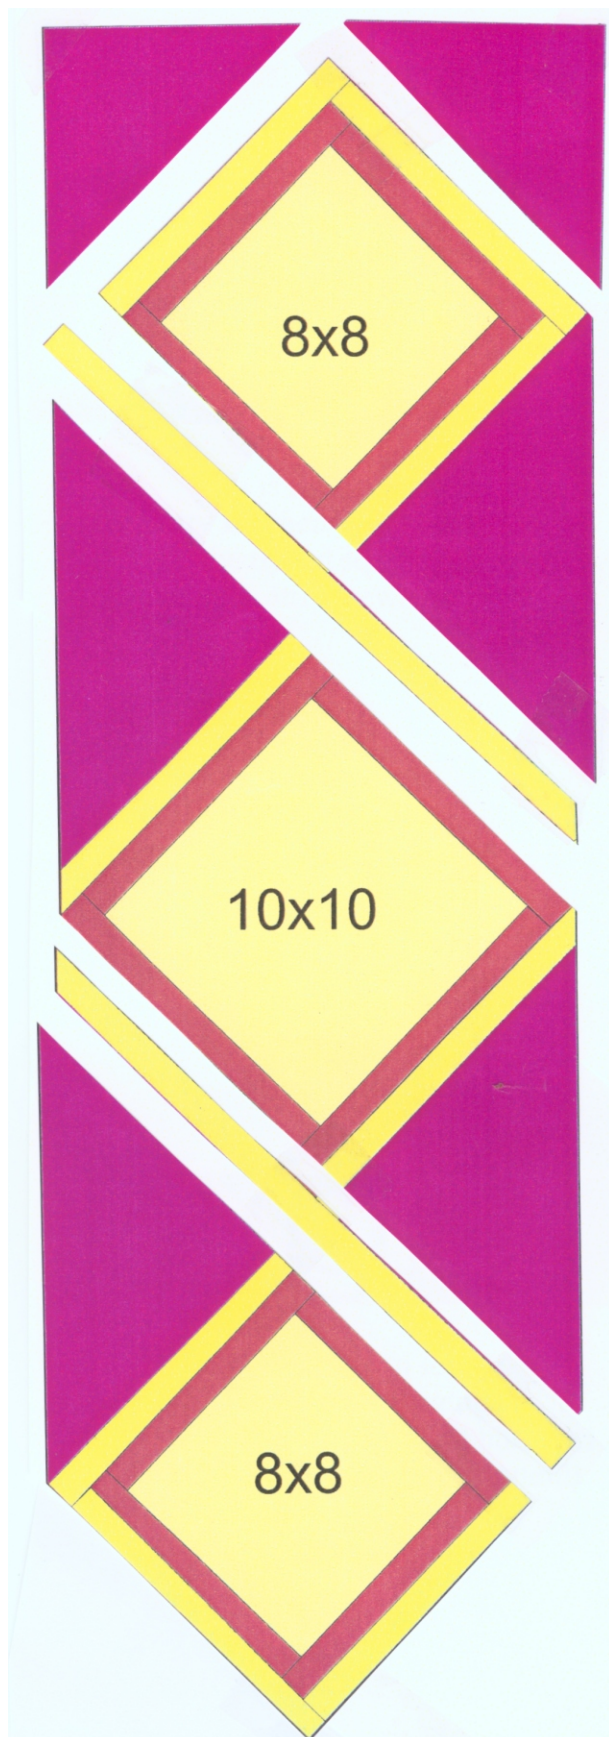

-  Pattern fabric
-  1" plaid fabric
-  1" stripe fabric
-  Solid fabric

3.75 yds of 2 1/8" bias in plaid

hdcc27

Hdcc27b

These two designs connect to create long borders.
Embroider design hdcc27 first. If you notice hdcc27b doesn't have a sunflower on the left side. This is so that it can connect to hdcc27 on the right side.
