

Notes on Madeira Thread

The design collection you have purchased was originally embroidered with Robison Anton thread. Anita Goodesign has recently switched to Madeira thread. All of our future collections and tutorials will reflect this change. For your convenience we have converted all of our previous collections from Robison Anton to Madeira. The following pages include scans of the Madeira colors as well as a listing of all of the designs with their corresponding Madeira colors. If the design calls for a certain technique like applique or if you need to see a photo of the design we suggest you view the original tutorial.

Anita Goodesign

This collection uses Madeira threads we have included a scan of the Madeira thread card for your convenience in matching thread colors.

MADEIRA

Anita Goodesign

This collection uses Madeira threads we have included a scan of the Madeira thread card for your convenience in matching thread colors.

hdcc27b

These two designs connect to create long borders.
Embroider design hdcc27 first. If you notice hdcc27b doesn't have a sunflower on the left side. This is so that it can connect to hdcc27 on the right side.
